

Task	<h2 style="text-align: center;">Pedestrian logistics improvement during World Youth Day 2016 in Kraków</h2>		
Action	<p>The world's largest pedestrian logistics simulation ever made in FlexSim</p> 	 <p>01 0110 0001 01101</p>	<ul style="list-style-type: none"> <li>• 2,5 milion people</li> <li>• 130 sectors</li> <li>• Hundreds road connections</li> <li>• bridges, viaducts, tunnels</li> </ul> <p style="text-align: center;">The first simulation model of World Youth Day in history!</p>
Result	<div style="display: flex; justify-content: space-between;"> <div style="text-align: center;">  <p><b>Sector emptying time reduction by</b></p> <h1 style="font-size: 2em;">66%</h1> </div> <div style="text-align: center;"> <p>Sectors leaving time</p> <p>Before <b>12 hours</b></p> <p>After <b>4 hours</b></p>  </div> </div>		
Benefits	 <p>Risk-free verification of planned changes</p>	 <p>Sector capacity optimization</p>	 <p>Calculation of the shortest possible sector leaving routes</p>
Why <b>FLEXSIM</b> ?	<div style="text-align: center;">  <p>3D model</p> </div> <div style="display: flex; justify-content: space-around; margin-top: 10px;"> <div style="text-align: center;">  <p>Reources optimization</p> </div> <div style="text-align: center;">  <p>Logistics improvement</p> </div> </div> <div style="display: flex; justify-content: space-around; margin-top: 10px;"> <div style="text-align: center;">  <p>Warehouse rationalization</p> </div> <div style="text-align: center;">  <p>Testing changes prior to implementation</p> </div> <div style="text-align: center;">  <p>Production planning</p> </div> </div> <div style="text-align: right; margin-top: 20px;"> <p><i>Click here to test a free version!</i></p> </div>
